### About This Game

#### ABOUT ESCAPE BLACK ORION

In Escape Black Orion you are an engineer working in a mysterious facility code named Black Orion. Something has gone wrong and now you are locked in the engineering bay and time is running out as gas pours into the room.

Using your wits and whatever tools you can find you must disengage the door locks to escape before your air runs out. Something is very wrong and you need to find out why but first you need to get out.

#### EPISODIC STORYTELLING

This episodic story base game is inspired by escape the room style games. Find clues and solve puzzles to unlock the door and begin your escape from this mysterious sci-fi world.

Each episode will tell you a little more about the mysteries of Black Orion as well as giving you new unique puzzles to solve.

- What is Black Orion?
- What is causing the explosions?

- 
- Was there an attack?
  - If so who is attacking and why?

## **VIRTUAL REALITY ESCAPE ROOM**

Escape Black Orion is a VR exclusive, built from the ground up, we wanted to create a visually stunning virtual reality escape room experience.

### **Episode 1**

Episode 1 will introduce you to the world of Black Orion and its characters. It features the first room you need to escape to survive. Each Episode will add more puzzles and reveal a little more about this mysterious place.

Episode 1 takes about 30-50 minutes to complete depending on how quickly you can solve the puzzles.

the things that they are not supposed to draw on the stencils since they don't befit such a thing (for example giant anatomy, moustaches on all the animals and just go rainbow nuts). Problem is the prog is useless as a form of meaningful expression for both adult and child unless your child is inbred and been hit in the head one too many times.

The premise is that you go through a town one hut at a time which contains a letter, when you click on the door a stencil for you to colour in appears which corresponds with the letter on the door. For instance 'A is for Apple' and you get to colour in an apple. The tools you get are a paintbrush, a palette of a dozen colours or so and a paint tin which fills in the whole area for you with the colour you choose. If you do or don't colour it in, does not matter as it will say 'good job' and then move onto the next hut which has a 'b for bee' etc.

Once you have gone through the whole alphabet it starts again with another word that starts with the letter A and so on. Don't worry it doesn't get too complicated the words are always easy. It's not like you come across a hut which gives you a complicated term like 'A is for Antichrist'.

The accompanying music is so bad that your child will probably be forced to find where you hide that locked away gun in the house and blow away 'S for speakers'. 'P for Police' will soon surround your house and then you will have to 'H for hide' from the law.

This 'T for Turd' is done by these Mexican developers... <http://www.ensenasoft.com/Vindex.html>

[\(Update it seems the developer's of this game banned my screen shot of the vegetable stencil with a red cross through it. Apparently it was too sensitive for them? Literally that is all it was. Their stencil of vegetables and a big red cross I painted through the middle of it. And this game is all about growing up?\)](#)

[And i thought with such a colourful review the Developers would have said 'Good Job, you're a cool bean!'](#)

<http://store.steampowered.com/curator/6843548/>. This virtual novel was engaging and the backgrounds were all fantastic. The dialogue was fine and the characters seemed really different from each other. The minigame was kind of boring after the first time and i still have no idea what happens based on the game. The in game events seemed like things that would actually happen.

[You should get this game if you want an engaging storyline and amazing artwork.. This game is, as of this review, early access, and that carries with it a \(valid\) implication of a lack of polish. That said, this game is perfect for people who want to participate in the Battle Arena craze but want to practice without committing others to have to put up with their newbie shenanigans. Practice your tactics, reloading on the fly, sniping without being a target yourself... No one knows how to do this right out of the gate, your favorite streamers have been doing this for YEARS. Granted, no AI will be as unpredictable as real humans, but this will give you a chance to rehearse and learn the habits to get you started.. If you don't like mature, dark and gory stuff, do NOT play this. Aside from this warning, this visual warning is amazing!!!](#)

[I cannot help but congratulate the people tha made this game! It is so well-written, so good to the eye, the music is terrific and the plot really got me addicted to this game. I really enjoyed it. That is why I strongly recommend it to people who want to get addicted to this twisted dark fairytale. :\). One of the worst shooters I've seen. Very simple, no substance at all, no challenge, poorly designed game mechanics, awful hit detection, annoying achievements. The is about 10 seconds of content before you're simply running in circles repeating the same thing for several hours.. Good game!](#)

[The game has a gameplay process that may seem simple but compensate it by many aspects in character's progression. Add to this point long story, good visual and great music. Hardly recommended to launch and play :\) Meet you in game, traveler :\) Dead Exit is a post-apocalyptic survival card game that tasks you with fending off zombies and gathering resources. It plays quickly, it's fun and the solitaire like single player part of the game is good. Where I imagine this game will shine though is in the multiplayer. It supports up to 8 players and allows each of them to work with others and form alliances to achieve goals cooperatively, or you can play the bad guy and make things more difficult for the other players while stealing resources from them or of course, a mixture of all of the above.](#)

All in all, a fun game and if you have a few friends to play with, you'll have a blast with it. Well worth the modest price.. Very addictive little game, excellent graphics and low system requirements make it a perfect indie game from a new dev.. The Hero Project: Redemption Season disregards everything that made the Heroes Rise Trilogy great.

The writing is extremely sloppy and, frankly, lazy. There are multiple points during the story when the perspective actually cuts away to different characters. There is no suspense, even when the author tries to build it, because everyone's motivations are known; even the characters who aren't subject to this treatment are completely transparent. None of the characters themselves are particularly compelling or complex. Any attempt to push that they are is hamfisted and forced.

There really isn't much content for what your paying too. Especially considering that it feels like the story ends halfway through, it's incomplete, in an effort to push people to buy the sequel. I can appreciate the argument this game practically shoves down its audiences throats, but the game itself isn't worth wasting time on.

I first played this in its original form on the website [miniclip.com](http://miniclip.com) about 8 years ago. now that it has come to steam the delay and responsiveness is improved but the gameplay has not really changed over the course of its development.

[Regardless this is still a very solid shooter for a fantastic price, and did I mention it has a great soundtrack?. Way too addictive! Loving the content, mods and performance enhancements. DLC prices reasonable. I want to support this good quality work. Can't wait until night racing possible.. Everybody loves to shoot through barrel chains in Donkey Kong Country \(yes you do; don't lie\), but what if a game was based entirely upon doing just that\u2014except really, really fast? Super Meat Boy fast? Faster than you can think, operating purely on gut instinct, responding from your prehistoric lizard brain to basic flashes of color and memories of pain?](#)

[That would be exhausting. That would be exhilarating. That would be HoPiKo.. Should be called 'The Unending Lag'. Feels like a crappy flash game from the early 2000's. Don't bother with this trash \(unless you want some crappy trading cards\).. First and foremost. This game is not Mario Kart. Do not buy this game if you're looking for a Mario Kart clone. This game, and the two All Stars Racing games are their own thing; and there is a lot more technicality in this game then what is presented in Mario Kart or other arcade based platform mascot racing games. You can spend 80+ hours in All Stars Racing Transformed \(ASRT\) and you'd still be counted as a scrub.](#)

[In TSR, the Devs have gone well and truly out of their way to try and explain everything to newer players. From in game tutorials to hints and tricks on the splash screens. Which should drastically reduce the amount of time it takes to learn some new things. Compared to ASRT, this game is slightly less technical in being able to do solo runs, but the new teamplay mechanics more then make up for it and introduce some very interesting plays. It's a strange mechanic, for a racing game when you look at it on paper, but hell does show in game.](#)

[ASRT was way faster and way more difficult then any other racing game in this genre. It was brutally competitive and on more then a few occasions I either went nuclear or witnessed other people doing so online. And because of it's speed, there was never any plausible protection against "lag bumps" or other such issues until somebody went and made a ghost mod for it for use in competitive lobbies.](#)

[The team mechanic works to both passively reduce this in three major ways.](#)

- [1.\) Allow teamwork to bring either get slowed players back up to speed; or increase the speed of nearby teammates with a slipstream mechanic. \(which maintains itself far behind the lead player so you don't need to worry about keeping up with, or slowing down for them if somebody gets hit.\)](#)
- [2.\) Reduce the number of hostile players by having 2 other team members.](#)
- [3.\) Reduce traffic in high problem areas by cutting them off to certain "classes" of karts.](#)

[Thus, the game retains it's incredible speed without having such a major impact with netcode issues. That is not to say that they don't still exist, they do, but they're far lessened then ASRT.](#)

[There are a few problems, finding lobbies online can be difficult, and glitches do exist for exploiting inclined folks to use in Time Attack and so on. This game also brings in two "blue shells" that need to be addressed as a lack of them in ASRT was one of the major things that made it so awesome.](#)

[The Lightning wisp, which attacks every member of the rival team. This thing is a huge dislike, and needs to be changed asap. Nobody likes unavoidable instant hits from nowhere.](#)

[And the Quake wisp, which summons tall rock statues from the ground. Although these can be avoided and act very much like the bees from ASRT, their proximity to each other is far too high and makes it truly difficult to do so compared with the bees. Simply changing the proximity should be enough.. This is a great party game and if you have no friends irl \(like me\) you can play bots :D. It's pretty good](#)
